PennHIP Report

Referring Veterinarian: Dr Helene Alm	Clinic Name: Anicura Djursukhoset Bagarmossen
Email: helene.alm@anicura.se	Clinic Address: Ljusnev 17 Bagarmossen, AB 12848
	Phone: 4 (685) 053-0300
	Fax: null

Patient Information

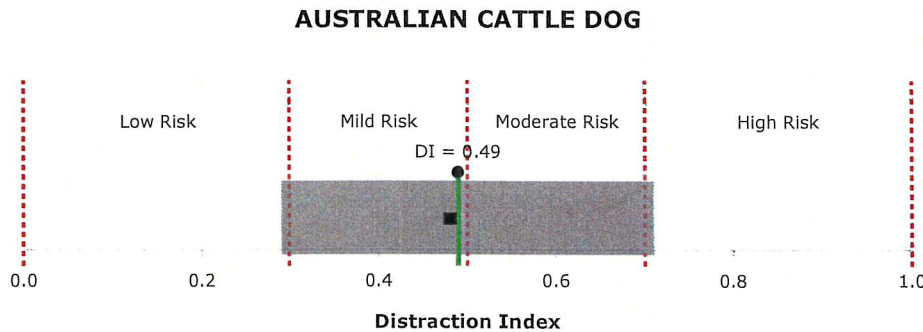

Client: Larsson, Sandra	Tattoo Num:
Patient Name: Foxie	Patient ID: 19/2378
Reg. Name:	Registration Num: SE50160/2017
PennHIP Num: 130082	Microchip Num: 616099120006448
Species: Canine	Breed: AUSTRALIAN CATTLE DOG
Date of Birth: 09 Jun 2017	Age: 23 months
Sex: Female	Weight: 30.9 lbs/14 kgs
Date of Study: 14 May 2019	Date Submitted: 14 May 2019
Date of Report: 22 May 2019	

Findings

Distraction Index (DI): Right DI = 0.49, Left DI = 0.20.
Osteoarthritis (OA): No radiographic evidence of OA for either hip.
Cavitation/Other Findings: No cavitation present.

Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.49.
 OA Risk Category: The DI is between 0.31 and 0.49. This patient is at mild risk for hip OA.
 Distraction Index Chart:

BREED STATISTICS: This interpretation is based on a cross-section of 574 canine patients of the AUSTRALIAN CATTLE DOG breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.29 - 0.71) for the breed. The breed average DI is 0.48 (solid square). The patient DI is the solid circle (0.49).

SUMMARY: The degree of laxity (DI = 0.49) falls within the central 90% range of DIs for the breed. This amount of hip laxity places the hip at a mild risk to develop hip OA. No radiographic evidence of OA for either hip.
